Calumet Park, Illinois selects REDFLEX for Red Light Enforcement Program; Ninth Contract Win for REDFLEX in Illinois This Year

15 September 2008

Redflex Traffic Systems Inc, a wholly owned subsidiary of Redflex Holdings Limited, is pleased to announce the contract award by the village of Calumet Park, Illinois. This is the sixth win in Illinois for the company since the signing of the Chicago contract in February 2008 -the largest deployment of red light photo enforcement systems in the world - and the ninth contract win in Illinois in 2008.

Calumet Park is located in Cook County, Illinois. The contract calls for up to 20 red light systems. REDFLEX was selected unanimously by the deciding committee immediately after the previous vendor terminated its selection prior to the program implementation. The contract term is five years with two consecutive automatic two-year renewals.

"This is our 29th contract in the state of Illinois. Our momentum in the state is an excellent example of how REDFLEX partners with communities to educate one another on the positive effects of photo enforcement programs and share data on accident reduction and modified driving behavior," said Karen Finley, CEO Redflex Traffic Systems.

Redflex Traffic Systems Inc has contracts with more than 200 U.S. cities, and is the largest provider of digital red light and speed enforcement services in North America. With photo speed programs in 9 states and photo red light programs across 20 states, REDFLEX has consistently led the market in contract wins, system installation rates and market share.
