

Release to Australian Stock Exchange

Three New Australian Contracts for Redflex Traffic Systems

27 June 2007

The directors are pleased to announce that Redflex Traffic Systems Pty Ltd, a wholly owned company of the Redflex group, has been awarded three contracts for the provision of a range of enforcement camera technologies in Australia totalling approximately \$2.5 million.

Redflex has been contracted to install 21 school zone speed cameras across New South Wales, as the first stage of the Roads and Traffic Authority 2007 School Zone Safety Program, to protect high risk schools throughout the State. In selecting the locations, the RTA assessed sites based on a combination of child pedestrian crash history, crash risk, traffic volume and pedestrian volume.

Redflex has also been awarded a contract, by the New South Wales Department of Primary Industries, for the provision of a target vehicle surveillance system for the enforcement of border crossings with Queensland. The Department of Primary Industries is responsible for regulating the introduction of livestock into NSW from Queensland to prevent the introduction of cattle ticks. There are seven border crossings between Queensland and NSW in the tick affected area. These crossings require monitoring of all vehicles heading in a southbound direction to identify "vehicles of interest" and initiate investigation of vehicles suspected of transporting livestock in possible contravention of the NSW Stock Diseases Act.

In Western Australia, Redflex has been awarded a contract for the provision of a Level Crossing Protection Enforcement System at selected railway level crossings. Initially, the contract is to install "Dual" enforcement cameras at two high risk level crossings. The systems monitor both directions of road traffic at the level crossing, enforcing safe driver behaviour when the railway warning signals are active. The systems provide front and/or rear photography of offending vehicles.

Ricardo Fiusco, General Manager of Redflex Traffic Systems Pty Ltd, said, "These are important innovations using the core Redflex enforcement camera technology in new applications".

Redflex Traffic Systems has contracts with more than 140 USA cities and is the largest provider of digital red light and speed enforcement services in North America. With photo speed programs in 9 states and photo red light programs across 18 states, Redflex leads the market in installed systems, installation rate and market share.
