Red Light Enforcement Contracts in Tualatin, Oregon and South Elgin, Illinois

16 October 2008

Redflex Traffic Systems Inc, a wholly owned subsidiary of Redflex Holdings Limited, is pleased to announce two new contracts - in Tualatin, Oregon and in South Elgin, Illinois.

Tualatin, OR

The photo enforcement program in Tualatin (population: 25,000) calls for up to eight red light systems. REDFLEX was selected over two other vendors in a competitive tender process. The contract term is five years with seven consecutive one-year renewal periods.

South Elgin, IL

With a population of 21,000, South Elgin is situated near neighboring Elgin, which also operates a REDFLEX red light enforcement program. The contract calls for up to 15 red light systems for a term of five years with two consecutive automatic two-year renewals.

"We are pleased with our new contract wins in states where we have a loyal customer base and program results concluding in accident reduction rates," said Karen Finley, CEO Redflex Traffic Systems. "We work to maintain this pace as we move into new states."

Redflex Traffic Systems Inc has contracts with more than 200 U.S. cities, and is the largest provider of digital red light and speed enforcement services in North America. With photo speed programs in nine states and photo red light programs across 21 states, REDFLEX has consistently led the market in contract wins, system installation rates and market share.
