Redflex Traffic Systems Announces Inaugural Photo Enforcement Program in the State of Montana

6 November 2008

Redflex Traffic Systems, Inc., a wholly owned subsidiary of Redflex Holdings Limited, is pleased to announce the contract award by the city of Bozeman, Montana. Bozeman is the first city in the state of Montana to adopt photo enforcement technology as a measure to reduce accidents and injuries on its roadways.

Bozeman is home to Montana State University and is the fifth largest city in the state, with a population approaching 30,000. REDFLEX participated in a competitive tender process and was selected based on its proven success in leading the first pilot photo enforcement programs in states including Arizona, California, Colorado, Ohio, Louisiana, Illinois and others. The contract in Bozeman calls for up to 30 red light systems. The contract term is three years with two consecutive three-year renewals.

“REDFLEX has implemented inaugural photo enforcement programs in 14 states across the U.S.,” said Karen Finley, CEO Redflex Traffic Systems. “We will continue to take this leadership role in new states by actively supporting officials who take the first initiative to improve road safety in their communities.”

Redflex Traffic Systems Inc. has contracts with more than 220 U.S. cities, and is the largest provider of digital red light and speed enforcement services in North America. With photo speed programs in 9 states and photo red light programs across 22 states, REDFLEX has consistently led the market in contract wins, system installation rates and market share.
