Redflex Traffic Systems Selected to Support County of Sacramento, California in Red Light Photo Enforcement Program

23 December 2008

Redflex Traffic Systems, Inc., a wholly owned subsidiary of Redflex Holdings Limited, is pleased to announce the contract award from the County of Sacramento, California. REDFLEX was chosen unanimously in a competitive tender process involving three other industry participants. REDFLEX scored nearly 25% higher than the next closest respondent, according to the evaluation given by the County.

The County of Sacramento contains a population of more than 1.3 million people. The County operates the red light program for the City of Sacramento, the state's capital. The contract for the County calls for a minimum of 20 red light systems with a term of three years and with an option for an additional two-year renewal.

"We are proud to have been unanimously selected by the County of Sacramento which runs one of the earliest and most respected red light programs in the state of California," said Karen Finley, CEO Redflex Traffic Systems. "We look forward to a mutually beneficial partnership where REDFLEX can give support to and aid in expanding the County's long-standing red light enforcement program."

Redflex Traffic Systems, Inc. has contracts with more than 225 U.S. cities, and is the largest provider of digital red light and speed enforcement services in North America. With photo speed programs in 9 states and photo red light programs across 22 states, REDFLEX has consistently led the market in contract wins, system installation rates and market share.
