

Redflex increases reach across Virginia and Oregon with New Red Light Contracts in Newport News, Virginia and Sherwood, Oregon

8 May 2009

Redflex Traffic Systems, Inc., a wholly owned subsidiary of Redflex Holdings Limited, is pleased to announce two new contracts with the cities of Newport News, Virginia and Sherwood, Oregon for the implementation of photo red light enforcement programs.

Newport News, VA

Newport News, with a population in excess of 185,000 is the fourth largest city in Virginia. The commonwealth code enables the City to implement systems at one intersection per 10,000 citizens, for a total of up to 18 enforcement intersections.

The contract awarded to Redflex resulted from a competitive tendering process and has a term of up to ten years through a three-year initial term and 7 additional one-year renewal terms.

“Newport News is situated on the Virginia Peninsula, which is the largest metropolitan area between Washington, D.C., and Atlanta, Georgia. We look forward to providing the City with a world-class photo enforcement program and to increasing our market leadership across the south-eastern United States” said Karen Finley, CEO/President.

Sherwood, OR

This Portland suburb has a population of approximately 17,000 and is located in Washington County.

The program is for up to 12 enforcement locations and has term of up to ten years through a three year initial term and 7 additional one-year renewal terms.

Redflex Traffic Systems, Inc. has contracts with more than 230 U.S. cities, and is the largest provider of digital red light and speed enforcement services in North America. With photo speed programs in 9 states and photo red light programs across 21 states, Redflex has consistently led the market in contract wins, system installation rates and market share.
